Regional consultation facilitates deliberations on addressing the NCD Program Implementation Challenges

Hyderabad, Nov 16 (FVB): In the wake of stubbornly increasing burden of NCDs in India, Project HOPE and Eli Lilly and Company (Pvt. Ltd. India) in support from the Ministry of Health and Family Welfare, Government of Telangana organized a Regional NCD Consultation on “Addressing NCD Program Implementation Challenges: How do we get there?” in Hyderabad, Telangana. The event focused on prioritizing recommendations for improving actions to combat NCDs challenges.

These recommendations included in a book of proceedings at the end. This consultation is a part of a series of consultations that being held in the different regions of the country, the first was held in Lucknow, Uttar Pradesh on 27th October 2017.

NCDs account for 61% of deaths in India each year (Global Burden of Diseases Report, 2016). The Non-Communicable Diseases constitute a major public health challenge, impacting both the social and economic development of India with substantial human costs. The purpose of the regional consultation was to bring together representatives from Government, national and international non-governmental organizations, civil societies, policy and program implementers, and private sector; to exchange and share their experiences and ideas about addressing operational challenges in implementing NCD programs. The consultation called on the Central and State Governments, along with other partners, to take the agenda for NCD action forward. These areas of action are essential to enable accelerated movement in India’s growing NCD challenges.

Dr. Padmavati, Additional Director at National Health Mission, Telangana shared the idea of coming together to overcome the growing hidden burden of NCD cases in the region. "Through the application of innovative and globally recognized best practices; and through dedication, and the wisdom of regional and local healthcare professionals and healthcare workers; we are committed to reducing the rate of NCDs." Chris Skopac, Executive Vice President, Project HOPE Global.

"By mobilizing the power in partnership, building skills of healthcare workers, increasing access to resources to deliver at scale, and improving monitoring; the seemingly impossible task of tackling the growing burden of NCDs in the country can be achieved." Dr. Laxmikant Pal, Regional Director for South-East Asia at Project HOPE. The consultation observed a group of over 50 participants from the host and neighboring State Health Department, national level government representatives, NGOs, private sector, and local health care organizations.

Some keynotes speakers included Dr. Rakesh Sanjay, professor Endocrinology, Osnana Medical College; Dr. Vijay Shekar Reddy, Professor of Endocrinology, Gandhi Medical Hospital; Dr. Devika Rani, Director ESI, Hyderabad; Mr. Indrpal Singh, Associate Director Access, Eli Lilly and Company; Mr. Hitesh Sahani, Global Health Program Leader, Eli Lilly and Company; and Dr. Lalitha Kumar, Director of Public Health and Family Welfare, State of Telangana. "The regional consultations with the involvement of the state officials, will help to achieve enhanced program management at the country level. We at Eli Lilly and Company are committed to the cause through the Lilly Global Health Partnership in India."

Edgard Olszowska, Managing Director Eli Lilly India Subcontinent at Eli Lilly and Company.
Re-energizing the NCD Community towards commitment and collaboration
