Project HOPE’s Ukraine Response

Project HOPE is implementing a highly coordinated, comprehensive humanitarian response to Russia’s invasion of Ukraine. Our team is on the ground in Ukraine, Poland, Romania, and Moldova actively delivering medicines, medical supplies, mental health support, trauma care trainings, and other urgent assistance.

In the first four months of our response, Project HOPE has delivered more than 300 pallets of gravely needed medicines and medical supplies inside Ukraine, including trauma supplies, insulin, needles, hygiene kits, and more. Outside the country, our multi-country refugee response is helping refugees, including children and those needing mental health care, access the care they need.

In all areas of our response, Project HOPE has endeavored to promote the localization of aid through collaboration, partnership and strengthening the capacity of local, non-governmental organizations. This approach was essential to the delivery of aid during the earliest and most acute phase of the crisis and we remain committed to it as our response grows and evolves in order to support sustainable solutions and promote more resilient communities.

To date, Project HOPE has...

- Supported 50 health facilities in Ukraine
- Delivered $4.7 million in pharmaceuticals and medical commodities
- Provided trauma care trainings for more than 1,200 health care workers in five health facilities
- Distributed more than 20,000 hygiene kits

Project HOPE is providing medical care to Ukrainian refugees through mobile medical teams provided by SAMU, a Spanish humanitarian organization Project HOPE has partnered with after previous emergencies like Hurricanes Eta and Iota in Honduras.
Provided emergency and ongoing medical services and medications to around 1,800 refugees on the Moldova border through a medical unit provided by SAMU (Servicios de Asistencia Médica de Urgencias), a Spanish NGO and Project HOPE partner.

Helped open mental health and psychosocial support center for refugees in Poland and two refugee child playrooms in Moldova.

USAID’s Bureau of Humanitarian Assistance awarded Project HOPE a 12-month grant which will reach 1.25 million people and 24 health facilities over the next year.

Opened four offices in Dnipro, Kyiv, Lviv, and Odessa, Ukraine.

Partnered with 10 local organizations to support our emergency response.

Pharmaceuticals to 82 health facilities
Medical consumables to 78 health facilities
Surgical supplies to 19 health facilities
Generators to 13 health facilities
Medical equipment to 11 health facilities
Rehabilitated health facilities in four cities

Provided direct patient care to more than 2,300 refugees in Poland

Provided mental health support or services to more than 8,300 people

Launched three mobile medical units
Featured Donors

Special thanks to our corporate donors who supported our 2022 Ukraine response with gifts of $10,000 or more.
