

Project HOPE's Ukraine Response

Project HOPE is implementing a highly coordinated, comprehensive humanitarian response to Russia's invasion of Ukraine. Our team is on the ground in Ukraine, Poland, Romania, and Moldova actively delivering medicines, medical supplies, mental health support, trauma care trainings, and other urgent assistance.

In the first six months of our response, Project HOPE has delivered more than 300 pallets of gravely needed medicines and medical supplies inside Ukraine, including trauma supplies, insulin, needles, hygiene kits, and more. Outside Ukraine, our multi-country refugee response is helping refugees access the care they need, including mental health support.

In all areas of our response, Project HOPE has endeavored to promote the localization of aid through collaboration, partnership and strengthening the capacity of local, non-governmental organizations. This approach was essential to the delivery of aid during the earliest and most acute phase of the crisis and we remain committed to it as our response grows and evolves in order to support sustainable solutions and promote more resilient communities.

Project HOPE is providing medical care to Ukrainian refugees through mobile medical teams provided by SAMU, a Spanish humanitarian organization Project HOPE has partnered with after previous emergencies like Hurricanes Eta and Iota in Honduras.

To date, Project HOPE has...

Supported
91 health facilities
in Ukraine

Delivered **\$4.7 million**
in pharmaceuticals
and medical commodities

Provided mental health and
psychosocial support trainings to
1,100 health care workers
social workers, and volunteers
