

2022 IMPACT REPORT

# Healing People, Transforming Lives

In 2022,  
Project HOPE...

Reached more than  
**2.8 million** people  
worldwide

## A Year of Transformative Impact

This report provides an overview of Project HOPE's impact in 2022 and the incredible accomplishments of our teams around the world. In a year marked by conflict, disasters, humanitarian crises, and major health inequities, Project HOPE's teams worked tirelessly to improve access to health care in communities that needed it most.

While this report outlines the far-reaching impact of our work and the millions of lives we were able to touch, there is even more that can't be captured on paper: like the dedication of our global teams, the courage they show in their work, and their commitment to delivering humanitarian aid to families and strengthening health systems in need. From the front lines of conflict to the quiet community health clinics that don't make headlines, Project HOPE's teams are living out the core belief of our entire organization in more than two dozen countries worldwide: that everyone, everywhere deserves access to the health care they need to reach their full potential.

Reached **1.5 million** people  
affected by disasters and  
humanitarian crises

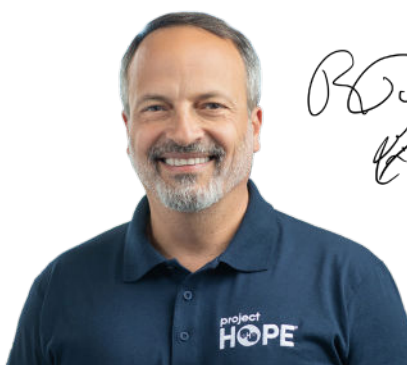

Provided direct medical  
services to **660,000** patients

Screened or tested  
**395,000** people for TB,  
HIV, diabetes, hypertension,  
or other diseases

Reached **233,000** people  
affected by HIV/AIDS

Donated **\$51 million** in  
essential equipment, medicines,  
and medical supplies

**Rabih Torbay**  
President and CEO,  
Project HOPE

## Advancing Global Health

Building long-term solutions that prioritize prevention and improve access to care and treatment

Project HOPE's work in 2022 strengthened health care workers, slowed the spread of infectious diseases, improved the health of women and infants, and advanced access to health care worldwide. As many health systems continued to recover from COVID-19, we partnered hand-in-hand with local communities to build sustainable change: training midwives in Indonesia, educating a new generation of nurses in Sierra Leone, renovating NICUs in the Dominican Republic, reducing the incidence of HIV/AIDS in Namibia, supporting charitable clinics to expand COVID-19 vaccines in the U.S., and more.

In 2022, Project HOPE's noncommunicable disease programs reached **590,000 people** worldwide

In the Dominican Republic, Project HOPE is helping reduce neonatal mortality rates by training hundreds of health workers and providing lifesaving equipment like incubators, high frequency ventilators, and radiant warmers.

## Humanitarian Assistance

Providing lifesaving support to communities in vulnerable situations

In 2022, Project HOPE provided direct medical services to **524,000 people** affected by disasters or humanitarian crises

2022 marked a somber milestone as the number of people forcibly displaced crossed 100 million worldwide. As conflict endured in Ukraine, Project HOPE's emergency response evolved into long-term humanitarian programming to meet ongoing needs. Project HOPE also provided emergency nutrition, medicines, vaccines, and mobile medical units that reached tens of thousands of people in Ethiopia. In Colombia, where years of migration have pushed hospitals near the Venezuela border to their limits, Project HOPE provided badly needed medical equipment, health care workers, and maternal care to support women and girls in need.

Project HOPE's work in Ethiopia is helping address the urgent health impacts of conflict and drought, which have affected millions of people.

## Emergency Relief

Delivering urgent relief when it matters most

Project HOPE's emergency response work in 2022 included comprehensive medical relief for hospitals, health workers, refugees, and families across Ukraine and the surrounding region.

Russia's invasion of Ukraine in 2022 set off the largest displacement of people in Europe since World War II. Project HOPE immediately launched a highly coordinated, comprehensive humanitarian response across Ukraine, Poland, Romania, and Moldova that included urgent medicine, medical supplies, medical equipment, reconstruction projects, mental health support, and more. Our teams were also on the ground in the aftermath of Hurricane Ian and Hurricane Fiona, delivering much-needed relief like medicines, hygiene kits, water filters, first-aid supplies, diapers, mosquito nets, and psychological first-aid.

In 2022, Project HOPE's pandemic preparedness and response efforts reached more than **353,000 people**
